

External Fan Motor

FEM 2

- Stainless Steel Finish
- Air Flow Ø 150 mm
- Max Flow Rate 1000m³/h.
- Easy Installation

FEATURES

Our External Remote Motor is the ideal accessory to optimize the performance of downdraft hoods, for models code FDDH 1120 TRC X and FDDH 900 TRC X. Made of high-quality materials, such as AISI304 stainless steel, this remote motor combines strength and durability with an elegant design. Its outstanding technical features include an air extraction with a diameter of Ø 150mm and a remarkable air flow rate of 1000m³/h. These technical specifications ensure effective air extraction and rapid elimination of vapors and odors, providing a clean and fresh kitchen environment.
