

Polyethylene Chopping Board

T 4233 PL

- Made of white polyethylene
- Resistance to stains and odors.
- Comfortable and functional work surface

FEATURES

The white kitchen cutting board is the ideal accessory for any kitchen, offering practicality, hygiene and durability. This cutting board is designed to withstand everyday shocks and impacts while providing excellent stain and odor resistance. Its contoured shape provides a comfortable and functional work surface, facilitating the preparation of ingredients with precision. Polyethylene is known for its ability to resist bacterial contamination, making this cutting board a hygienic choice for food handling. It is easy to maintain, quick to clean and disinfect after use.
